

Diskeeper®
2009
with InvisiTasking™

Real-time defragmentation,
zero overhead™

See what other Fortune 1000 companies have to say about us

“I wouldn’t have a client machine or a Windows® based server without Diskeeper on it. PERIOD.

Since first installing Diskeeper I have seen blinding speed and far less hang-ups with Windows, which is a tremendous improvement. The trialware expired and within three days my PC was grinding to a halt and hanging on a regular basis. The standard defrag product with Windows made little improvement and took a long time to run. After the Diskeeper product was registered properly it found over 13,000 fragments and brought my dragging PC back to full brilliancy!

We are using Diskeeper on Windows XP client machines, on MS SQL Servers and on Windows 2003 servers with Boeing applications running on them. NO NOTICEABLE RESOURCES CONSUMED!

My area has over a dozen servers and AutoCAD Map 2008 with 4 GB of RAM. I can run all of the servers at once without ANY issues, but if I stop Diskeeper with InvisiTasking, even for a very short time, it really slows down in a hurry.”

Boeing – #28 Fortune 100 List
Dept. GG-GG-T48E
Saint Louis, MO*

“Fragmentation of the virtual disk on VMware virtual machines happens more frequently than on a physical drive. The VMware solution is inefficient and impractical. I use Diskeeper on our VMware virtual machines that have been barely functional before because we needed a robust and versatile solution. I currently use Diskeeper on all of our workstations to maintain optimal disk performance.”

*James E. Winkey, Systems Network Administrator
Armstrong World Industries – #558 Fortune 500 List
Lancaster, PA*

“In my lab we can generate lots of data files and a drive can become VERY fragmented (30% or more). With Diskeeper running in the background I never have to worry about this anymore! Clearly it has become a time saver. I would give Diskeeper 10 out of 10! It runs so well in the background you forget that it is even there!”

*Tom Rea
Chevron – #4 Fortune 100 List
Richmond, CA*

“We had numerous complaints from our users about delays in data retrieval. These delays would continue to grow until we performed a manual defrag of the drive array. We operate 7 days a week, 24 hours a day, so finding the right time to defrag the drive array without impacting our users was always a challenge. Diskeeper’s InvisiTasking® has allowed us to provide improved data access to our users without impeding or degrading our users’ computing experience. Since Diskeeper, complaints from our users have completely disappeared.

Our IT staff no longer has to find the time to perform manual defrags that always seemed to impact users’ experience, they now have more time to dedicate towards improving our systems and processes versus just trying to maintain the status quo.”

*John S. Hansmann, MIS
Time Warner Cable Media Sales – #48 Fortune 100 List
Cypress, CA*

“Diskeeper has been running very smoothly on my systems and I’m impressed by how non-resource-intensive it is (the InvisiTasking really works well!) It runs so quietly I normally forget that Diskeeper is even there. I can tell you the systems I installed it on ran a lot faster after I had done the defragmentation using Diskeeper.”
