

Diskeeper® 2011

Optimum system performance. Always.™

How Much Speed Are You Losing?

*"...Diskeeper shaves off 10 minutes from a 40-minute scan of about a TB."
– Lockheed Martin*

The Role of Unnecessary I/O in Reducing System Speed

Additional, unnecessary I/O required to complete file operations cripples system performance. Unhandled or managed improperly, it rapidly leads to losing as much as 90% data speed across servers and workstations alike. The effects can be seen in every aspect of business computing, including simple file accesses, boot times, backups, and antivirus scans. In this era of business efficiency, you simply can't afford to operate at such reduced speeds.

Typical Performance Loss without Diskeeper

Backup Time	45%
File Access	39%
Antivirus Scan	28%
Boot Times	13%

What Are People Saying About Diskeeper?

*"The most dramatic improvement was seen during the Desktop Excel Save test where a 66.7% improvement was realized."
– Windows IT Pro: Ensuring Maximum Performance on Windows 7 Systems*

"...Team members report less issues and faster boot cycles...I have used Diskeeper for years and believe the benefits are measurable." – Shell

"We have been very pleased with our decision to deploy Diskeeper companywide. After the Diskeeper deployment, our Service Desk received a number of calls from users asking why their systems were so much faster. These are the type of calls we love to take! Our experience with Diskeeper has been overwhelmingly positive." – General Mills

"We are really satisfied with the improvements delivered by Diskeeper which totally answered all our needs...performance has improved, back up and data access times have been considerably reduced. We win both in terms of time and money." – HSBC

"Our backup times have been cut by about 75%...Diskeeper works smoothly and all servers are now reporting better response times. Everyone in the company has benefited from the Diskeeper deployment! Time is money. As Diskeeper has saved us time, it has saved us money – thus instant ROI." – AO Smith

How Do You Recover Lost Speed?

Diskeeper® storage performance software has been the leading disk storage performance utility for over 30 years. Constantly evolving in order to ensure maximum performance across new storage models and computing environments, it continues to be a mission-critical solution for your mission-critical applications. With the groundbreaking development of IntelliWrite® write optimization technology, Diskeeper also prevents up to 95% of file fragmentation before it ever occurs. No maintenance windows, no resource overhead, and no need to manage operations – just improved performance.
