Diskeeper Corporation Ships 100,000 Licenses of New HyperFast Technology for SSDs to Apacer

(Burbank, CA) January 16, 2009—Diskeeper Corporation, innovators in performance and reliability technologies, today announced new HyperFast™ technology shipped over 100,000 licenses to Apacer during its first month on the market. Apacer, a global leader in memory modules, collaborated with Diskeeper Corporation in September 2008, licensing HyperFast technology to create the SSD+ Optimizer. HyperFast is the world's first optimization software for Solid State Drives (SSDs) providing faster performance and extended lifespan. In December, the alliance received an overwhelming reception in Japan, Europe, India, Taiwan and USA.

SSDs are becoming increasingly popular as they promise significantly better performance than conventional HDDs. IDC recently reported that the SSD market will have a compound annual growth rate of 70% from 2007 to 2012. However, SSDs have had technical challenges to overcome as PC operating systems are not optimized for this platform and SSDs possess a limited number of erase-write cycles. This leads to not only a dramatic deterioration in performance by as much as 80% over six months, they also suffer a shorter lifespan.

HyperFast directly addresses these issues by intelligently eliminating performance-degrading free space fragmentation, and eliminating the excessive erase-write cycles that SSDs would otherwise incur during normal usage. By preemptively optimizing the free space at the operating system level, HyperFast ensures peak performance of the drive and a longer lifespan.

The purpose of the Diskeeper - Apacer collaboration is to service the ever-expanding SSD market ahead of consumer demand, supplying the solution to a known, growing problem. Not only have SSDs now hit the mainstream, more than half of SSDs shipped today are used in the enterprise environment, and they are already demanding the solution as illustrated by recent HyperFast sales.

"Diskeeper is excited to be a part of this revolutionary partnership with Apacer," said Modesto Rodriguez, Vice President of Strategic Alliances at Diskeeper Corporation. "With our combined efforts we are able to provide the public with a solid product and innovative technology that will last."

For OEM inquires about HyperFast licensing opportunities, please call 800-829-6468 or contact hyperfast@diskeeper.com. Free trial ware at: <http://www.diskeeper.com/hyperfast/index.aspx>

About Diskeeper Corporation—*Innovators in Performance and Reliability Technologies*[®]: Global Fortune 1000 and Forbes 500 large enterprises rely on Diskeeper software to provide unparalleled performance and reliability to their business laptops, desktops and servers. Diskeeper Corporation further provides real-time data protection and real-time data recovery™ with Undelete[®] data recovery software (www.undelete.com).

About Apacer Technology Inc. —*Access the best*:

Apacer Technology Inc. is a global leader in memory module and digital storage for both hardware and software research and development. Since the company's inception, Apacer's focus on recording, reproducing and retaining digital data of all kinds, allows our customers to "Access the best" memory products and services. Apacer is the fifth largest independent DRAM module supplier with a global sales and marketing network to support distributors, OEMs, and retail customers. Apacer has built a reputation for memory modules that offer high performance, reliability and value. Apacer also provides some of the newest and most exciting digital mobile entertainment devices that play, record, share and store the digital content that is part of everyday life. For more information about Apacer, please visit www.apacer.com
